## Do you know the difference?

### King pins — Colour combinations

#### King Pin, upper, 211 401 361 b

##### Distinguishing marks:

This king pin is equipped with a needle bearing; its shaft has a uniform diameter of 22 mm.

The discontinued type of king pin with sintered metal bush had the part number 211 401 361.

#### King Pin, lower, 211 401 367 b

##### Distinguishing marks:

This king pin is equipped with a needle bearing and the bore that receives the upper king pin has a diameter of 22 mm.

The discontinued type of king pin with sintered metal bush had the part number 211 401 367.

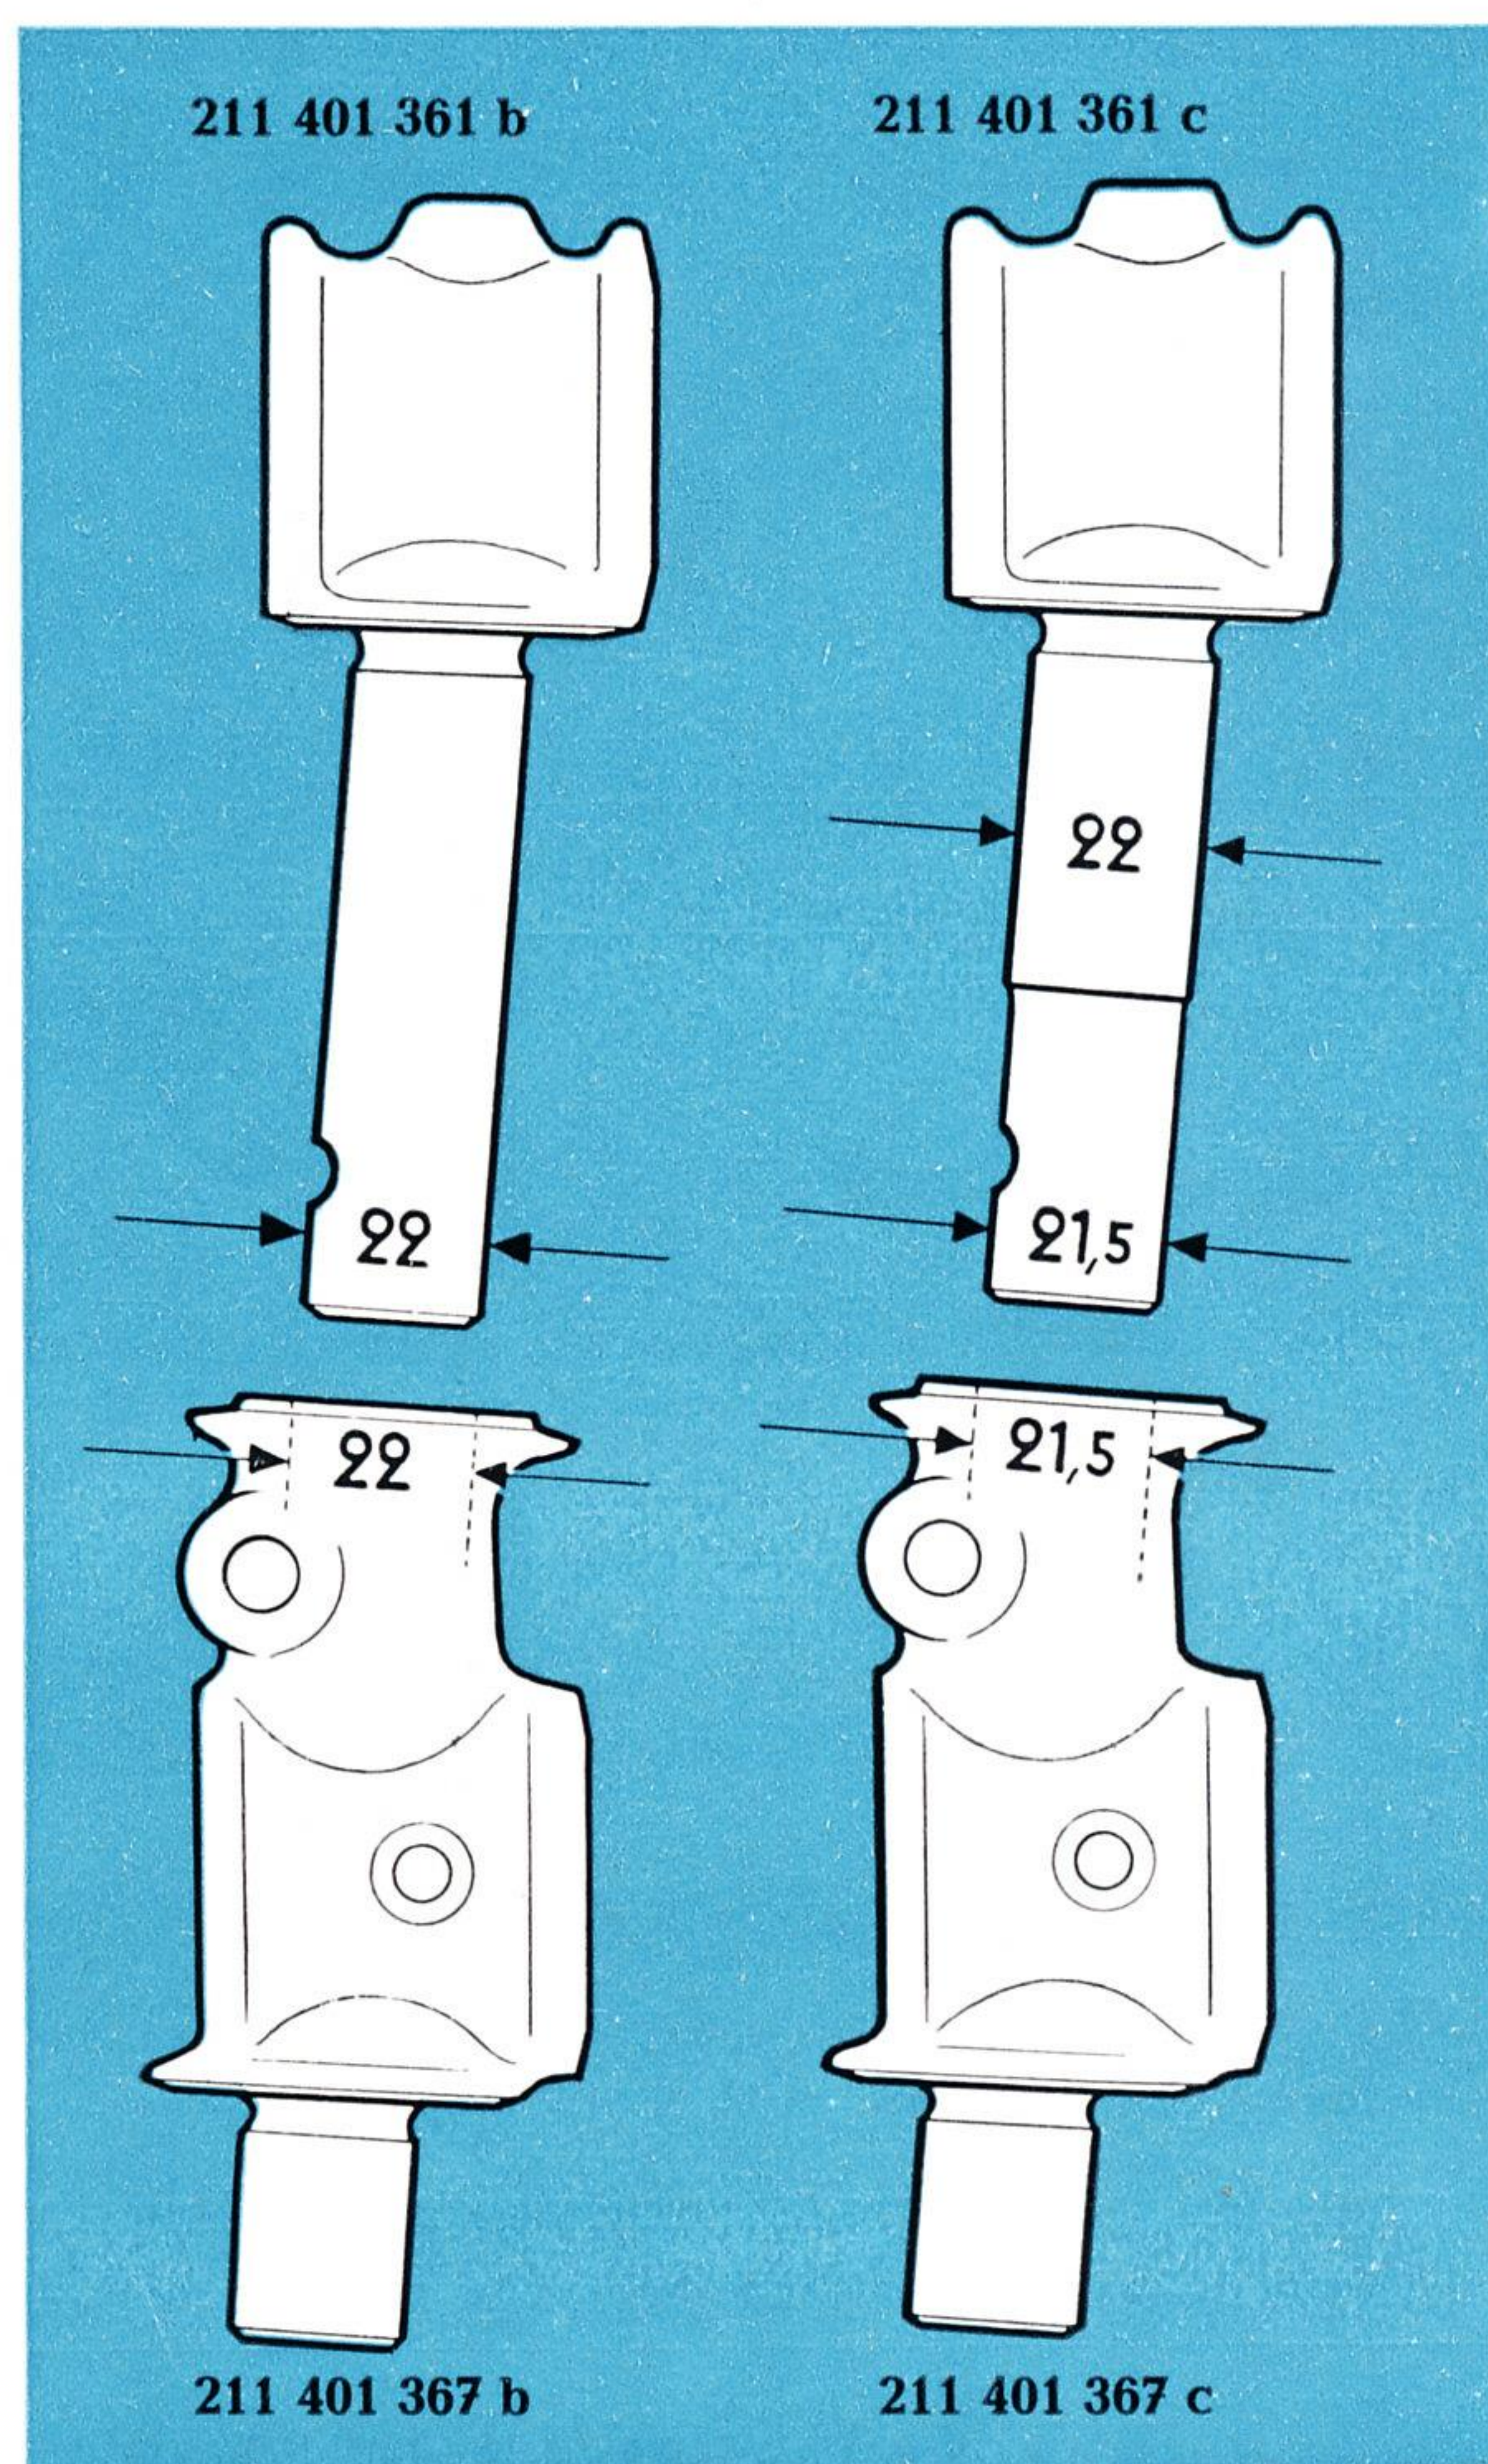

**Note.** — The king pins 211 401 361 b and 211 401 367 b cannot be matched with the latest type king pins given below. They remain available as spares for a separate replacement of either the upper or lower king pin. If, however, both upper and lower king pins call for a replacement, the latest, type pins (denoted by "c" after part number) should be used. Upon completion of this gradual transition, the earlier king pins will be removed from stock.

#### King Pin, upper, 211 401 361 c

##### Distinguishing marks:

To allow a regrinding of worn king pins, the portion that enters the lower king pin is of reduced diameter (21.5 mm) from Chassis No. 20—33 426 onwards.

The discontinued type of this king pin with torsion arm link pin bush had the part number 211 401 361 a.

#### King Pin, lower, 211 401 367 c

##### Distinguishing marks:

The bore receiving the upper king pin is of reduced diameter (21.5 mm).

The discontinued type of this king pin with torsion arm link pin bush had the part number 211 401 367 a.

Is your knowledge up-to-date?

VW owners in search of guidance and information contact you. They have confidence in your advice. The customer expects to get the correct information and immediate help. To be acquainted with the progressive refinements of the VW is, therefore, a vital part of your specialised know-how. Full knowledge of the modifications is also the key to ordering the right parts in right numbers and at the right time. Quoting the part numbers on orders is sufficient for getting the required spares. The description of the required part is only a supplement. However, when ordering parts of the interior trim, the part number should be supplemented by the colour identification number that corresponds to the exterior colour of the

vehicle. In cases where this number cannot be ascertained, it is recommended to send in a sample of the cloth. The colour combination schedule given below includes the correct numbers for ordering paint, cloth, and imitation leather; the latter also being VW Genuine Spares as are the primers and polishes. They are subject to our quality and colour specifications and are continuously checked by our inspection staff. For the use in service shops, paints are delivered in tins of 1 or 0.5 kg, and mixing enamels in such of 100 grammes. The instructions given in the colour pattern pad should be strictly followed.

Colour Combinations

For Type 1 — VW Standard, from Oct. 1st, 1952 to March 9th, 1953, from Body No. 337 537 to 392 966

| Colour of vehicle                         | pearl grey             | medium blue             | black               | medium green             |

On the occasion of the general meeting of the German Union of Graphic Artists in 1954 a jury selected "The best 15 advertising posters of the year". Among these were the two VW posters:

- "Guarantee seal" (Used cars)
- "Crank unit" (Spare parts).

This is in clear evidence of the outstanding advertising effect of these two posters. Displaying them in show windows, waiting rooms, and at the parts counter will pay great dividends.
